A riddle by Gabi lemos

I go to where I come from, never stopping

But I stay, I never move a muscle yet go many miles each day.

If you got an answer give it to Mrs Bates class ☺

A little bit of reminders.

- **Red nose day is on 13th march 2015**
- **Hooray! Easter is on the spring term closes. On Friday the 27th of March**

ANIMALS

As it is currently winter, I have decided to write about the polar bear, a beautiful creature who's species is continuously threatened by global warming.

Let's start off with a few facts:
Polar bears are

also known as Sea bears and they are the largest land predators. They live up to around 25 years old.

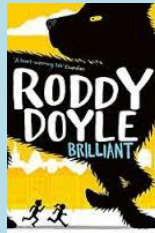

To help save the polar bear habitat, you can take more walks instead of using so much petrol by driving in cars.

Visit of Princess Anne

This is at the Cambridge fire station where Serena (year 5) and Douglas
(year 6) met Princess Anne.

Mission to mars.

Some people have decided to go to Mars. Until 2024 they will be training to go. There are 100 people who are in with the chance of being one of the 24 going to Mars. The people will be living in luxurious pods.

THE SILLY NEWS IN HOLLAND

The children in Holland have been learning about poo. For more information visit CBBC Newsround. (If you want to see the poo go to Holland.)
